PERSONAL PROJECTS

Food Delivery Frontend Design (06/2021 - 07/2021)

- Developed responsive and user-friendly web interface for food delivery app using HTML, CSS, and JavaScript. Applied modern design principles, mobile-first approach, and CSS media queries for seamless user experience across devices.

Text Analyser (04/2022 - 05/2022)

- The Text Analyser Website uses JavaScript, Bootstrap, and React.js to create a user-friendly platform for analyzing and manipulating text. It offers tools like word count, character count, copy text, and text case conversion. With an intuitive interface, it provides a seamless and efficient text manipulation experience.

News Fetching Website (06/2022 - 07/2022)

- The News Fetching Website utilizes NEWSAPI to fetch the latest news. Built with Bootstrap, React.js, API, and JavaScript, it offers a user-friendly platform to access news articles. Stay informed with real-time updates, search for specific topics, and enjoy an engaging news browsing experience.

Todo Website (08/2022 - 10/2022)

- The Todo Website is a full-stack app with React.js, Bootstrap, JavaScript, and MongoDB. Users create, manage, and store todos with login/signup support. MongoDB enables seamless storage and retrieval. A user-friendly platform for efficient task management, combining robust technologies.
